

MOHAMMAD TAJI

Full-Stack Developer | MERN | MNRN Stack

m.taji1381@gmail.com | 09158293988 | linkedin.com/in/mr-tag2

Mashhad, Iran

Professional Summary

Senior Full-Stack Developer with 7+ years of experience building scalable, high-performance applications and distributed backend systems. Expert in **NestJS, TypeScript, PostgreSQL, Redis, Docker**, and modern frontend frameworks. Proven track record in **real-time architectures, API optimization (40%), delivery acceleration (30%),** and **code quality improvement (45%)**. Experienced in leading teams, designing system architecture, and delivering production-grade services with **99.9% uptime** for international clients.

TECHNICAL SKILLS

Backend

NestJS, Node.js, TypeScript, Express.js, RESTful APIs, WebSocket, Event-Driven Architecture, Dependency Injection, Guards, Interceptors, Middleware, Clean Architecture, SOLID Principles, CQRS (basic), Background Jobs (BullMQ), Rate Limiting, Logging & Monitoring

Databases

PostgreSQL (Schema Design, Indexing, Query Optimization, Migrations), MongoDB & Mongoose (Aggregation, Indexing), Redis (Caching, Rate Limiting, Queues), SQL Server (Stored Procedures, Query Optimization)

DevOps & Infrastructure

Docker (Multi-stage builds, containerized deployments), Nginx (Reverse Proxy, Load Balancing), CI/CD (GitHub Actions, GitLab CI), PM2 (Process Management), PaaS Deployment (Liara), Production Monitoring, 99.9% Uptime Systems

Frontend

React.js, Next.js (SSR, SSG, ISR), TypeScript, Tailwind CSS, Material-UI v5, Component Architecture, Performance Optimization

Other

Agile/Scrum, Git, Code Review, System Architecture, Payment Integration, Real-time Sync Systems

PROFESSIONAL EXPERIENCE

Back End Developer | Wingsnovaa | June 2025 – Present

- Designed and optimized scalable RESTful APIs (40% faster response time)
- Built secure authentication systems (JWT, RBAC)
- Architected **real-time synchronization** using WebSocket + Redis
- Implemented **PostgreSQL** schemas, indexing, and optimized queries
- Developed **background jobs** and queues using BullMQ
- Containerized services using **Docker** and deployed via CI/CD
- Maintained **99.9% uptime** across production environments
- Implemented caching layers with **Redis** for high-performance workloads

Back End Developer (Part-Time Remote) | Wingsnovaa | August 2024 – June 2025

- Built backend infrastructure for traffic fines system with payment gateway integration
- Architected real-time sync services for smart key management application
- Maintained 99.9% uptime on Liara PaaS for critical production services
- Optimized database queries and implemented caching for improved performance

Front End Team Lead | Arvin Vira | April 2023 – June 2025

- Led team of 5+ developers on e-commerce and corporate platforms for UK/Netherlands clients
- Reduced delivery time by 30% and improved code quality by 45%
- Established component libraries and coding standards across projects
- Mentored junior developers and conducted technical interviews

PROFESSIONAL EXPERIENCE

Frontend Developer | Arvin Vira | September 2022 – April 2023

- Architected enterprise admin panels using React 18, TypeScript, and Material-UI v5
- Built reusable component library with 50+ components, reducing code duplication by 40%
- Optimized app load time by 35% through code splitting and lazy loading
- Improved developer productivity by 50% through better tooling and documentation

Frontend Developer | ParsAlphabet | February 2021 – May 2022

- Developed responsive UIs for large-scale administrative automation platform
- Created intuitive experiences for complex workflows, improving user adoption
- Implemented data visualization components for reporting dashboards
- Optimized frontend performance and ensured cross-browser compatibility

Full-Stack Developer | Prkimia | June 2019 – February 2021

- Developed web applications using ASP.NET, jQuery, and SQL Server
- Delivered "Continuous Evaluation and Procurement" system
- Delivered "Cash and Warehouse Management" solution
- Optimized SQL queries and created user-friendly interfaces for complex processes

EDUCATION

Ferdows Institute of Higher Education | Computer Software Engineering | March 2024

Sadjad University | Computer Software Engineering | October 2020 – August 2023

CERTIFICATIONS & CONTINUOUS LEARNING

- Advanced JavaScript and React.js development
- Node.js and backend development best practices
- Database design and optimization
- Agile and Scrum methodologies
- Cloud deployment and DevOps practices

LANGUAGES

Persian (Native) | English (Professional Working Proficiency)
