

MOHAMMAD TAJI

Full-Stack Developer | MERN | MNRN Stack

m.taji1381@gmail.com | 09158293988 | [linkedin.com/in/mr-tag2](https://www.linkedin.com/in/mr-tag2) Mashhad, Iran

Professional Summary

Full-Stack Developer with 6+ years building scalable web applications and leading teams. Expertise in MERN/MNRN stacks with proven track record delivering high-impact solutions for international clients. Known for 40% API optimization, 30% faster delivery, and 45% code quality improvements.

TECHNICAL SKILLS

Backend: Node.js, Express.js, NestJS, TypeScript, RESTful APIs, JWT, Swagger/OpenAPI, Middleware, Error Handling, Logging

Frontend: React.js, Next.js, TypeScript, Material-UI v5, jQuery, Component Architecture, State Management, Performance Optimization

Database: MongoDB, Mongoose, SQL Server, Query Optimization, Schema Design, Caching Strategies

DevOps: PaaS Deployment (Liara), CI/CD, Production Deployment, Real-time Sync

Other: Agile, Git, Code Review, System Architecture, Payment Integration

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Wingsnovaa | June 2025 – Present

- Designed RESTful APIs reducing response times by 40%
- Built JWT authentication and role-based access control systems
- Architected real-time synchronization services for smart key management
- Deployed production services supporting thousands of daily users with 99.9% uptime

Back End Developer | Wingsnovaa | August 2024 – June 2025

- Built backend infrastructure for traffic fines system with payment gateway integration
- Architected real-time sync services for smart key management application
- Maintained 99.9% uptime on Liara PaaS for critical production services
- Optimized database queries and implemented caching for improved performance

Front End Team Lead | Arvin Vira | April 2023 – June 2025

- Led team of 5+ developers on e-commerce and corporate platforms for UK/Netherlands clients
- Reduced delivery time by 30% and improved code quality by 45%
- Established component libraries and coding standards across projects
- Mentored junior developers and conducted technical interviews

Frontend Developer | Arvin Vira | September 2022 – June 2025

- Architected enterprise admin panels using React 18, TypeScript, and Material-UI v5
- Built reusable component library with 50+ components, reducing code duplication by 40%
- Optimized app load time by 35% through code splitting and lazy loading
- Improved developer productivity by 50% through better tooling and documentation

PROFESSIONAL EXPERIENCE

Frontend Developer | ParsAlphabet | February 2021 – May 2022

- Developed responsive UIs for large-scale administrative automation platform
- Created intuitive experiences for complex workflows, improving user adoption
- Implemented data visualization components for reporting dashboards
- Optimized frontend performance and ensured cross-browser compatibility

Full-Stack Developer | Prkimia | June 2019 – February 2021

- Developed web applications using ASP.NET, jQuery, and SQL Server
- Delivered "Continuous Evaluation and Procurement" system
- Delivered "Cash and Warehouse Management" solution
- Optimized SQL queries and created user-friendly interfaces for complex processes

EDUCATION

Ferdows Institute of Higher Education | Computer Software Engineering | March 2024

Sadjad University | Computer Software Engineering | October 2020 – August 2023

CERTIFICATIONS & CONTINUOUS LEARNING

- Advanced JavaScript and React.js development
- Node.js and backend development best practices
- Database design and optimization
- Agile and Scrum methodologies
- Cloud deployment and DevOps practices
